

Exception

```
classDiagram
    class Exception {
    }
    class DBOperationException {
    }
    Exception <|-- DBOperationException
```

The diagram illustrates a class hierarchy. At the top is a white box representing the 'Exception' class, which has three horizontal compartments. Below it is a grey box representing the 'com.sterlite.cal.core.exception.DBOperationException' class, also with three horizontal compartments. A blue arrow with a hollow triangular head points from the top compartment of the grey box to the bottom compartment of the white box, indicating that 'DBOperationException' inherits from 'Exception'.

com.sterlite.cal.core.exception.  
DBOperationException
