

Serializable

```
classDiagram
    class Serializable
    class AddonProductsVO {
        +AddonProductsVO(CUGReference cugRef)
        +CUGReference getCugRef()
        +void setCugRef(CUGReference cugRef)
        +String toString()
    }
    AddonProductsVO --|> Serializable
```

The diagram illustrates a class hierarchy. At the top is the 'Serializable' interface, represented by a box with three horizontal compartments. The top compartment contains the name 'Serializable', while the other two are empty. Below it is the 'com.sterlite.cal.cugvpn.value Objects.AddonProductsVO' class, represented by a larger box with three horizontal compartments. The top compartment contains the package and class name. The middle compartment is empty. The bottom compartment lists four methods: '+ AddonProductsVO(CUGReference cugRef)', '+ CUGReference getCugRef()', '+ void setCugRef(CUGReference cugRef)', and '+ String toString()'. A blue arrow with an open triangular head points from the top of the 'AddonProductsVO' class box to the 'Serializable' interface box, indicating that 'AddonProductsVO' implements 'Serializable'.

com.sterlite.cal.cugvpn.value
Objects.AddonProductsVO

+ AddonProductsVO(CUGReference
cugRef)
+ CUGReference getCugRef()
+ void setCugRef(CUGReference
cugRef)
+ String toString()
