

Serializable

```
classDiagram
    class Serializable
    class ChannelVO {
        +String getId()
        +void setId(String id)
        +String toString()
    }
    ChannelVO --|> Serializable
```

The diagram illustrates a class hierarchy. At the top is the 'Serializable' interface, represented by a white box with a black border and three horizontal compartments. The top compartment contains the name 'Serializable', while the other two are empty. Below it is the 'ChannelVO' class, represented by a gray box with a black border. The top compartment of 'ChannelVO' contains the fully qualified name 'com.sterlite.cal.ivr.valueobject.ChannelVO'. The bottom compartment lists three public methods: '+ String getId()', '+ void setId(String id)', and '+ String toString()'. A blue arrow with a hollow triangular head points from the top of the 'ChannelVO' box to the bottom of the 'Serializable' box, indicating that 'ChannelVO' implements or inherits from 'Serializable'.

com.sterlite.cal.ivr.valueobject.
ChannelVO

+ String getId()
+ void setId(String id)
+ String toString()
