

Serializable

```
classDiagram
    class Serializable
    class ServiceAttribute["com.sterlite.cal.cugvpn.value Objects.ServiceAttribute"]
    ServiceAttribute --|> Serializable
```

The diagram shows a class hierarchy. At the top is a box for the 'Serializable' interface, divided into three horizontal sections. Below it is a larger box for the 'ServiceAttribute' class, also divided into three horizontal sections. The top section of the 'ServiceAttribute' box contains the package and class name. The middle section is empty. The bottom section lists the class's methods, each preceded by a '+' sign. A blue arrow points from the top of the 'ServiceAttribute' box up to the 'Serializable' box, indicating that 'ServiceAttribute' implements or inherits from 'Serializable'.

com.sterlite.cal.cugvpn.value
Objects.ServiceAttribute

- + ServiceAttribute()
- + String getName()
- + void setName(String name)
- + String getAlias()
- + void setAlias(String alias)
- + String getValue()
- + void setValue(String value)
- + String toString()
