

Serializable

```
classDiagram
    class Serializable
    class TotalOctatesVO["com.sterlite.cal.pcc.value\nObject.TotalOctatesVO"]
    TotalOctatesVO --|> Serializable
```

The diagram illustrates a class hierarchy. At the top is the 'Serializable' interface, represented by a rectangle with three horizontal compartments. The top compartment contains the name 'Serializable', while the other two are empty. Below it is the 'com.sterlite.cal.pcc.value Object.TotalOctatesVO' class, represented by a larger rectangle with a grey background. This class is divided into three horizontal sections: the top section contains the package and class name, the middle section is empty, and the bottom section lists five methods. A blue arrow with an open triangular head points from the top of the 'TotalOctatesVO' class box up to the bottom of the 'Serializable' interface box, indicating that 'TotalOctatesVO' implements 'Serializable'.

com.sterlite.cal.pcc.value
Object.TotalOctatesVO

- + String getTotalOctets()
- + void setTotalOctets
(String totalOctets)
- + String getUnits()
- + void setUnits(String
units)
- + String toString()
