

Serializable

```
classDiagram
    class Serializable
    class SIDetailsRequest["com.sterlite.cal.ivr.valueobject.SIDetailsRequest"]
    SIDetailsRequest --|> Serializable
```

The diagram shows a class hierarchy. At the top is the 'Serializable' interface, represented by a box with three horizontal compartments. The top compartment contains the name 'Serializable', while the other two are empty. Below it is the 'SIDetailsRequest' class, represented by a box with three horizontal compartments. The top compartment contains the fully qualified name 'com.sterlite.cal.ivr.valueobject.SIDetailsRequest'. The middle compartment is empty. The bottom compartment contains three methods, each preceded by a '+' sign: 'String getSiNumber()', 'void setSiNumber(String siNumber)', and 'String toString()'. A blue arrow with an open triangular head points from the top of the 'SIDetailsRequest' box to the bottom of the 'Serializable' box, indicating that 'SIDetailsRequest' inherits from 'Serializable'.

com.sterlite.cal.ivr.valueobject.
SIDetailsRequest

- + String getSiNumber()
- + void setSiNumber(String siNumber)
- + String toString()
