

Serializable

```
classDiagram
    class Serializable
    class ResourceAttribute["com.sterlite.cal.cugvpn.value Objects.ResourceAttribute"]
    ResourceAttribute --|> Serializable
```

The diagram shows a class hierarchy. At the top is a box labeled 'Serializable'. Below it is a larger box representing the 'ResourceAttribute' class. A blue arrow with an open triangle head points from the 'ResourceAttribute' box up to the 'Serializable' box, indicating that 'ResourceAttribute' inherits from 'Serializable'.

com.sterlite.cal.cugvpn.value  
Objects.ResourceAttribute

- + ResourceAttribute()
- + String getName()
- + void setName(String name)
- + String getAlias()
- + void setAlias(String alias)
- + String getValue()
- + void setValue(String value)
