

Serializable

```
classDiagram
    class Serializable
    class ServiceSpecDemographics["com.sterlite.cal.brm.cache.valueobject.ServiceSpecDemographics"]
    ServiceSpecDemographics --|> Serializable
```

The diagram illustrates a class hierarchy. At the top is a box representing the 'Serializable' interface, divided into three horizontal sections. The top section contains the text 'Serializable', while the other two are empty. Below this is a larger box representing the 'ServiceSpecDemographics' class, also divided into three horizontal sections. The top section of this box contains the text 'com.sterlite.cal.brm.cache.valueobject.ServiceSpecDemographics', while the other two are empty. A blue arrow with an open triangular head points from the top section of the 'ServiceSpecDemographics' box up to the bottom of the 'Serializable' box, indicating that 'ServiceSpecDemographics' implements or inherits from 'Serializable'.

com.sterlite.cal.brm.cache.valueobject.
